EDUCATION

Stony Brook University — Stony Brook, NY

Expected May 2029

B.S. Computer Information System | Global Excellence Scholarship Recipient

- Relevant Coursework: Data Structures, Discrete Math, Linear Algebra

TECHNICAL SKILLS

Languages: Python, Java, SQL, HTML

Tools: Git, MySQL, FastAPI, Streamlit, VS Code, Canva, Modern Campus CMS

ML / AI: PyTorch, PyTorch Geometric, GraphSAGE GNN, Gemini API, NetworkX, Pandas

Areas: Backend Dev, ML Systems, Blockchain/Web3

PROJECTS

Fraud Investigation Copilot | *Python · PyTorch Geometric · GraphSAGE · Gemini API · FastAPI · Streamlit*

- Engineered a GraphSAGE GNN fraud detection system that models structural transaction patterns including money rings, structuring, and smurfing, detecting fraud invisible to traditional ML models
- Integrated Gemini LLM to auto-generate regulatory-grade SAR narratives, reducing manual investigation time from 3 hours to under 60 seconds; built FastAPI backend + Streamlit investigator chat interface

CourtPrice | *React · Node.js · Express · REST API · eBay Browse API · CSV Data Processing*

- Built a full-stack tennis analytics platform with a React + Vite frontend and Node.js/Express REST API backend, enabling real-time ATP player search, match history retrieval, and live signed-memorabilia pricing from the eBay Browse API
- Designed a multi-route REST API architecture decoupling data sources (local CSV match history vs. live third-party API), aggregating pricing metrics (avg, min, max, listing count) and surfacing structured JSON responses to the client
- Implemented CSV-based data pipeline to parse and query ATP match records by player, surface, and tournament; optimized lookup performance for sub-second search responses

Sol Quest | *Phaser · Solana · Web3* | *Hopper Hacks 2026 — Beginner Track Winner*

- Co-built a Phaser top-down game on the Solana blockchain where players pay to enter and earn real cryptocurrency rewards; engineered wallet integration, transaction handling, and real-time on-chain reward distribution
- Shipped a functional full-stack product end-to-end in a hackathon environment, winning the Beginner Track against competing teams

WORK EXPERIENCE

CRIZM – VIP RESEARCH, Stony Brook University — Stony Brook, NY

Jan 2026 – Present

Junior CRIZMeer | ML Backend & Data Pipeline Teams

- Work on ML backend and data pipeline teams for an AI-assisted grading/accreditation platform, focusing on APIs, storage architecture, evidence ingestion, and export workflows across a production-oriented multi-term research system
- Extended Joern-based static analysis tooling to support C++ and Python codebases, enabling automated code quality assessment across multiple languages for the grading and feedback pipeline

Auxiliary Services Association, Stony Brook University — Stony Brook, NY

Jan 2026 – Present

Marketing Student Assistant

- Implemented SEO and accessibility standards by refactoring metadata, navigation hierarchies, and content workflows across multiple university sites
- Audited and optimized 15+ OmniCMS managed pages using HTML, CSS, and JavaScript, achieving WCAG 2.1 Level AA compliance and improved frontend performance

Stony Brook University – LIN 200 — Stony Brook, NY

Jan 2026 – May 2026

Undergraduate Research TA

- Mentor 150 students; selected by faculty based on professionalism and academic performance for content development responsibilities

LEADERSHIP & ACTIVITIES

- Professional Junior Tennis Player — competed in 40+ national tournaments, reaching top-150 singles ranking; represented home state at National Championships
- Captained High School Varsity Tennis Team, demonstrating long-term commitment, discipline, and peer leadership
